Start small but consistent

Always do something to move our research forward during this time

Make changes directly to paper (NOT COMMENTS, except for analyses)

Move the paper along quickly (48-72 hours) or the will be skipped and circled back

CC the entire team as papers move forward so the rest of the team can see the progress

- Nyenhuis grants in the summer (many kinds; annual; summer support)
- Frost Center Fellowships (annual; year-long fellowship)
- Towsley Research Scholar Fellowship (third-year; four-year fellowship)
- Departmental support

U d a a

- OSRP is terrific
- Next month (November) we'll host a grant-writing discussion / workshop
- Start small and then build up

Make them **SMART**: Specific, Measurable, Attainable, Realistic, and based on a Timeline

Break them into smaller sub-

- Fear, perfectionism, and procrastination are three of the biggest three to productivity
 - **Fear** that you will be rejected (newsflash: you will) or be thought stupid (reviewers are USUALLY constructive) or aren't good enough (you have something important to say)
 - **Perfectionism** keeps us from sending things out (submitted is better than unpublished)
 - **Procrastination** stall us out indefinitely and can be dealt with by scheduling and holding your self accountable
- Do it, even when you don't want to (in the moment)
- Swing for the fences...you can always work your way down the publication or grants ladder
- We learn from rejection, and we usually get better
